

### Extra Trash Pickup Process

For city customers, extra trash outside your regular container is handled through our **tag system**.

- Extra-trash tags are sold at your city office. You can purchase them directly from the city.
- Attach one tag to each extra bag and place the tagged bags next to your container on your next scheduled pickup day.
- If you ever have more extra trash than tags will cover, give our office a call. We can schedule a rear-load truck to come by and pick it up.
- If you find that you consistently have more trash than your current container can hold, contact the Cty. They can drop off an additional toter at a discounted rate.

If you have any questions about extra trash or how the tag system works, we're always happy to help. Just give us a call.
